The finest wire wheels that money can buy

- ◆ All of our wheels are hand-built in California. The hubs are direct-bolt, not the former "Uni-lug" style. Our hubs are much thicker and stronger than the originals. The hubs are one-piece.
- ◆ Our wheels are quadruple-plated with chrome plating over a copper and double-nickel base and hand-polished front and rear for a show-quality finish. We back our wheels with a 3-year limited warranty against defects in manufacturing and workmanship.
- ◆ Our set price includes four wheels and four center caps. These wheels have 50 spokes. Standard and reversed wheels are built as tubeless.
- ◆ Lip-lace style wheels and larger sizes and widths can be custom ordered at an additional cost.
- ◆ Custom size wheels are available. 16, 17 and 18 inch wheels may be ordered at extra cost. We can tailor wheels to your car with special back-spacings.
- ◆ Please expect a 3-4 week period of time to build your wheels; they will be worth the wait. Lug nuts, washers, valve stems and wheel locks are included.

Reversed spoke pattern - Set price: \$1,599.95

Standard spoke pattern - Set price: \$1,499.95
